SUMMARY OF DUTIES

This position is located in the Joint Forces Headquarters—State, Logistics Directorate (J-4), Surface Maintenance Facility. The primary purpose of this position is to perform maintenance, repair, and inspections on the electrical, hydraulic, and mechanical components on armored vehicle turrets. The incumbent performs maintenance on the electrical system of the turrets. Repairs the stabilization control systems, circuit breakers, distribution boxes, cables, and wiring system, points and all other electrical components in the turret. Replaces Line Replaceable Units (LRUs). Tests and repairs electrical test sets that are used to test the electrical systems of the tank turret. Follows schematic diagrams and relays to determine if there is malfunction in the test equipment. Repairs the hydraulic system, which provides the pressure to elevate and traverse the gun and rotate the turret. Repairs all mechanical parts involved in turret traversing, such as the traversing gearbox including the clutch assembly, and turret races including cupola bearings. Repairs the gears and bearings in the gearbox. Repairs all small gear drive components including those required to raise and lower the gun. Services the gun by exercising the recoil system to check for leaks in the seals. Borescopes the gun tube to check for wear. Makes recoil adapter readings to determine that the adapter and collar are serviceable. May also work on ITVs, howitzers, and other less complex equipment. Performs other duties as assigned.
